👤 PROFILE

I'd describe myself as a well-rounded technical guy who is quick to learn and adapt to change. Working primarily on writing/content management. Although my experience so far has been that you need a bit more than solid writing to be a good technical writer. Well versed in networking, CI/CD, version control systems, VMs and more.

📁 EMPLOYMENT HISTORY

Technical Writer at Frinx, Poprad

July 2021 — May 2022

Full time

- lead on technical documentation, complete overhaul of documentation process
- automated process of building and deploying documentation - I used tool Retype, it builds beautiful HTML and CSS from Markdown code
- automated release notes - standardization of commit messages together with a script allowed us to pull release notes directly from Github's commit history

Technical Writer at Frinx, Liptovský Mikuláš

September 2019 — June 2021

Part-time

- introduction to real-world software development process - CI/CD
- technical documentation creation/management
- website management (WordPress, ReactJS)
- preparing environment for testing (VMs in Proxmox)

🎓 EDUCATION

Bachelor's degree, Technical University in Košice, Košice

2018 — 2021

Continuation of previous field of study:

- deeper understanding of computer networks - CCNA, CCNP introduction
- more in-depth software development courses

Informačné a digitálne technológie, Súkromná stredná odborná škola Ul. 29. augusta, Poprad

September 2014 — June 2018

A great introduction to everything IT:

- software development, networking, graphical design

⚙️ COURSES

Cisco CCNA, Technical University in Košice

2020 — 2021

★ RELEVANT SKILLS

Working level programming understanding

I'm not a developer. But you're not looking for another developer. I have experience in working with Python, JS, Shell which to me proved sufficient to work and accurately write about complex technologies and processes.
