English

## 👤 PROFILE

I'd describe myself as a well-rounded technical guy who is quick to learn and adapt to change. Working primarily on writing/content management. Although my experience so far has been that you need a bit more than solid writing to be a good technical writer. Well versed in networking, CI/CD, version control systems, VMs and more.

## 📁 EMPLOYMENT HISTORY

### Technical Writer at Frinx, Poprad

July 2021

#### Full time

- lead on technical documentation, complete overhaul of documentation process
  - attention to detail and thorough review process
- testing of software to accurately prepare documentation
- preparing environment for testing (VMs in Proxmox)

### Technical Writer at Frinx, Liptovský Mikuláš

September 2019 — June 2021

#### Part-time

- introduction to real-world software development process - CI/CD
- technical documentation creation/management
- website management (WordPress, ReactJS)

## 🎓 EDUCATION

### Bachelor's degree, Technical University in Košice, Košice

2018 — 2021

#### Continuation of previous field of study:

- deeper understanding of computer networks - CCNA, CCNP introduction
- more in-depth software development courses

### Informačné a digitálne technológie, Súkromná stredná odborná škola Ul. 29. augusta, Poprad

September 2014 — June 2018

#### Great introduction to everything IT:

- software development
- computer networks
- graphical design

## ⚙️ COURSES

### Cisco CCNA, Technical University in Košice

2020 — 2021

## ★ RELEVANT SKILLS

#### Working level programming understanding

I'm not a developer. But you're not looking for another developer. I have experience in working with Python (some helpful scripts) and JavaScript (ReactJS website management) which to me proved sufficient to work and accurately write about complex technologies and processes.
